(54) Title: METHOD AND SYSTEM FOR DEVICE MANAGEMENT

(57) **Abstract:** In the method and system of the invention device management is performed by managing objects in devices in a device management system in a mobile network infrastructure. The system comprises a first server with a first device management application using a first protocol, a second server with a second device management application using a second protocol, an interface between them and a device with objects to be managed. The first management application initiates a device management session with the interface in order to manage the objects in said device. The interface translates the objects to be managed into a form understood by the second management application and invokes management operations to be made by the second management application. The first management application then performs the management operations to said device. The system of the invention comprises said first server, said second server, said interface between them implementing protocol conversion, and a database storing mapping relationships between first protocol objects to be managed and second protocol objects to be managed, and a device with second protocol objects to be managed.
